

# The Cloud Factory Activity Page

Parents, use these suggested activities to encourage discussion with your child about how God created clouds and everything else in nature.

*Then God said, "Let there be lights in the sky to separate day from night. These lights will be used for signs, seasons, days and years. They will be in the sky to give light to the earth." (Genesis 1:14-15)*

Using a piece of gold foil or yellow construction paper, have your child add the sun to the picture that he/she created of the sky and clouds from Activity Page #1. Then, have him/her use a piece of black paper and white chalk to make a nighttime sky with stars and the moon.

Find an astronomy book at the library and teach your child to identify nighttime constellations. Talk about how big the sky looks and how much bigger God must be to have made it all.
